Building durable systems and AI products

Software engineer with ten years at early-stage startups, taking products from zero to one and on to enterprise customers. I build the systems products run on, from durable workflow engines to voice agents and AI assistants

EXPERIENCE

Independent consulting and research · Jun 2026 – Present, Aug 2024 – Sep 2025

- Built voice support agents for B2C finance and quick commerce companies, and Ally, a WhatsApp diabetes care assistant
- Research and open-source work on agent evaluation, retrieval and durable execution, and now robotics with an SO-101 arm

Coram AI · Founding software engineer · Oct 2025 – May 2026

- Built Coram Assistant, which answers questions about a customer's cameras and access control and runs long investigations into what happened in their buildings
- Built platform features including real-time alerts and the background tasks framework

Giga · Founding software engineer · Jan 2025 – Mar 2025

- Built the voice agent platform from scratch for a text-first support product, with customers including DoorDash and Cloudbeds
- Solved RAG latency, interruptions and accents, added AI provider fallbacks and made the voice experience configurable

GM Labs · Founding software engineer · Apr 2022 – Apr 2024

- Built four products from scratch: Perch for long-form reading, Startup Archive, Perch AMA and gm.xyz
- Led the backend, infrastructure, AI article indexing, recommendations and token gating, and worked on web and mobile

Superstream · Founder · Sep 2021 – Mar 2022

- Built the streaming payments protocol and SDKs on Solana, used by companies for payroll and subscriptions

Harness · Founding software engineer · Apr 2019 – Aug 2021

- Built the workflow engine behind Harness's CD, CI, Feature Flags and Cloud Cost products, running weeks-long workflows
- Led the move to microservices as revenue grew 50x and products went from one to six. Harness is now valued at $5.5B

AlphaGrep Securities · Quant researcher and trading analyst · Jul 2018 – Mar 2019

- Built high-frequency trading strategies for Chinese commodity markets, which became the team's most profitable market

Dgraph · Founding software engineer · Nov 2017 – Jun 2018

- Launched Ratel, Dgraph's cluster UI, and built its JavaScript and Python clients, now 70,000+ downloads a month

Plato · Founder · Jul 2015 – Sep 2017

- Career mentoring chat app. Funded by Commence Mint, YC Startup School, second in Microsoft Imagine Cup India 2015

PROJECTS

design2code-rl 2026
RL environment grading coding agents on rebuilding websites from screenshots. Claude Code scored 0.80 over 100 trials

durable-execution 2025
Durable execution engine for TypeScript tasks and workflows, with Convex and Drizzle storage. Five packages on npm

pdf-rag-embed-bench 2025
Benchmark of text, multimodal and multi-vector embedders for PDF retrieval. The best combination reached 94.0% NDCG@5

microgpt 2024
124M GPT pretrained from scratch on 8 H200s for about $128, beating GPT-2 on HellaSwag (34.6% vs 29.4%)

Programming tutoring system 2014
Automated programming feedback with Sumit Gulwani (Microsoft Research) and Amey Karkare (IIT Kanpur), used by 400+ students

SKILLS

Technologies: TypeScript, Python, Go, Java, Rust, Haskell, SQL, PyTorch, React, Kubernetes

Systems: Durable and distributed systems, agents, evals and embeddings

EDUCATION AND AWARDS

Education: Indian Institute of Technology Kanpur, B.Tech in Computer Science and Engineering, 2012 – 2016. CPI 9.6/10, Academic Excellence Awards 2013, 2014 and 2015

Awards: All India Rank 196 in IIT-JEE 2012 among 500,000 candidates · Indian National Mathematics Olympiad qualifier, 2010 and 2011 · KVPY fellowship, Government of India
